

# Drywite

## Product Guide

2022 Edition

## Welcome

### to the latest edition of the Drywite Product Guide

Drywite Ltd evolved from the Pioneer Potato Company Ltd, which was incorporated on 20th July 1933 by H.G. Lee when his fourteen-year-old son Malcolm had the inspired idea of selling ready peeled potatoes. To overcome the problem of their peeled potatoes discolouring when kept out of water, Malcolm and his father formulated their own preservative, which caused such interest among local fish friers that they soon gave up potato peeling to concentrate on the production of their preservative, which was patented and named Drywite.

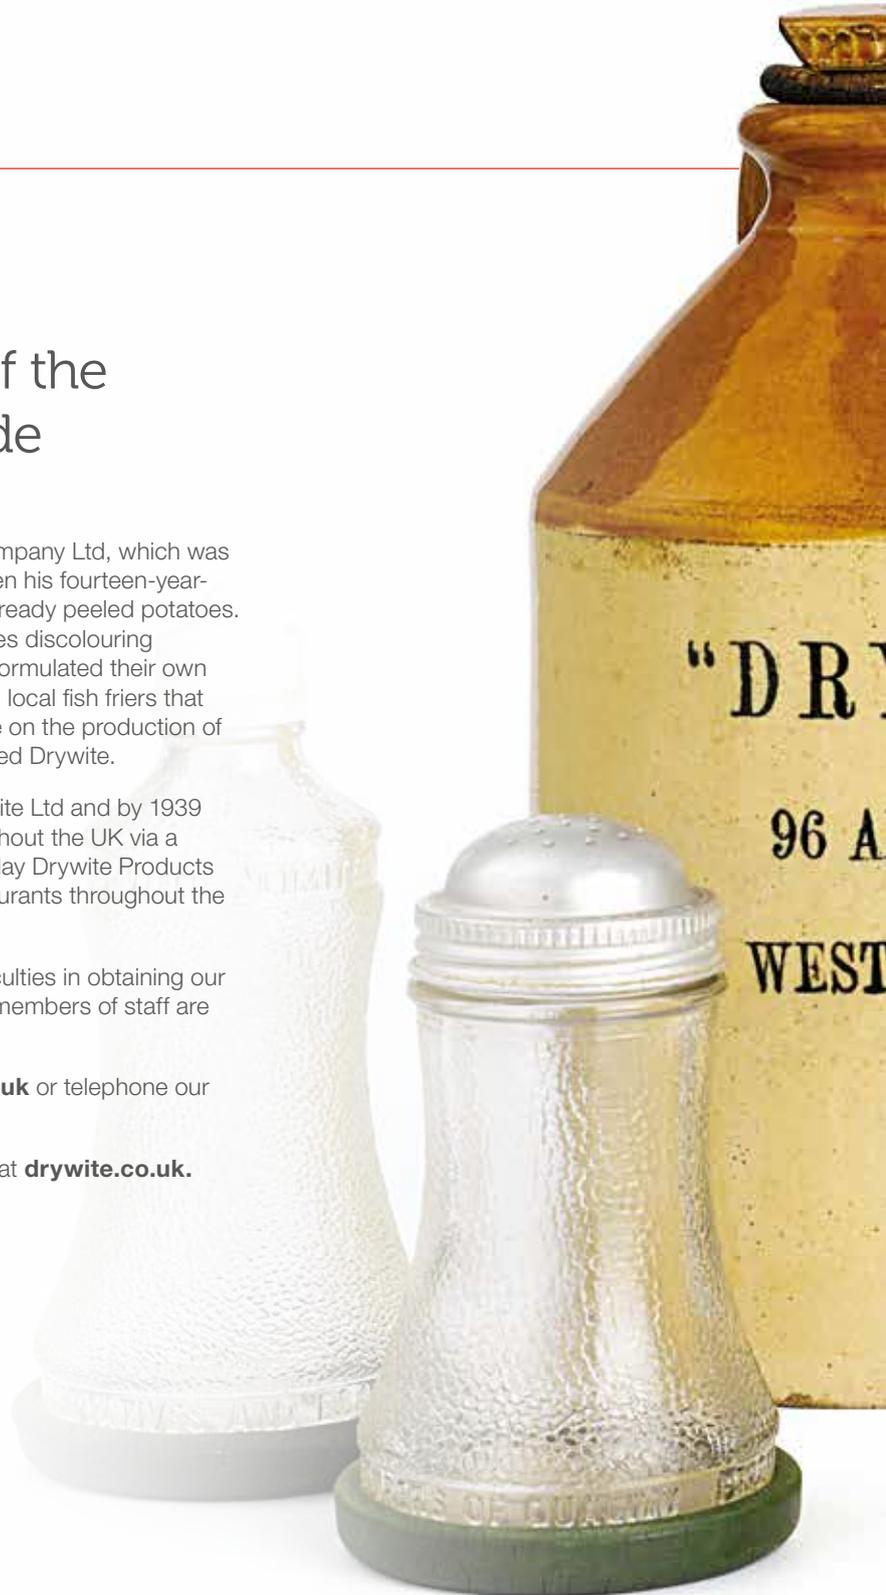

In 1935 the company changed its name to Drywite Ltd and by 1939 Drywite Potato Preparation was available throughout the UK via a national network of Fish Frier's suppliers and today Drywite Products are used in most Fish and Chip shops and restaurants throughout the World.

Should you have any queries or experience difficulties in obtaining our products; our experienced and knowledgeable members of staff are always here to help.

Please contact us by email: [sales@drywite.co.uk](mailto:sales@drywite.co.uk) or telephone our **Sales Hotline 01384 569556**.

Any new updates will be posted via our website at [drywite.co.uk](http://drywite.co.uk).

Drywite's  
unique formula  
for dry and  
white chips

**all year  
round**

Drywite All Seasons Premier Potato Treatment

DAS-2.5 2.5 kg bottle, packed 6 per case.

**£23.00 ea**

# Drywite All Seasons Premier Potato Treatment

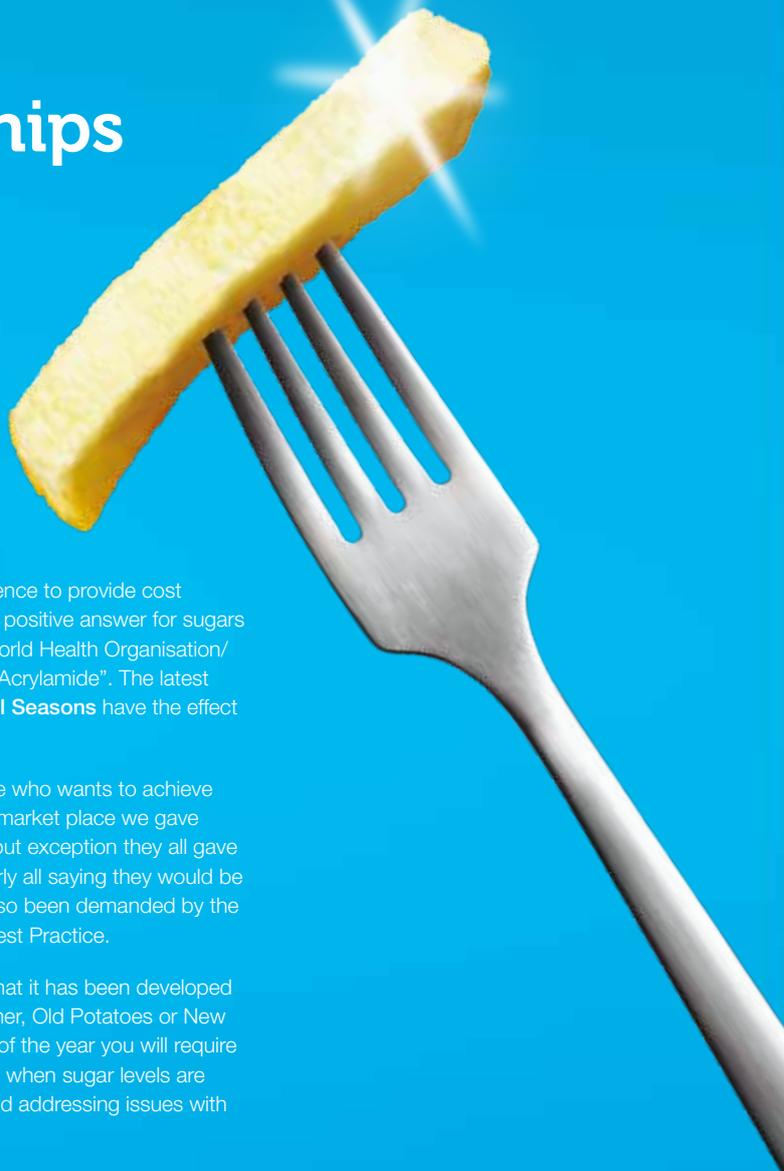

- ✓ Premium quality, dry and white chips all year
- ✓ Formulated to work even on increased sugar potatoes
- ✓ Reduces the formation of acrylamide on chips
- ✓ Technically superior for a superior frier

# Premium Quality Chips

throughout the whole year

**Drywite All Seasons** has been developed using almost 90 years experience to provide cost effective variable dosing for use all year round. **Drywite All Seasons** is a positive answer for sugars and starch found in potatoes; it's ingredients are recommended in the World Health Organisation/ Food & Agriculture Organisation of the UN "Best Practice on combating Acrylamide". The latest Food Drink Europe Toolbox also states that the ingredients in **Drywite All Seasons** have the effect of reducing Acrylamide.

**Drywite All Seasons** has been developed for the premier fryer, someone who wants to achieve the very best results. Before we introduced **Drywite All Seasons** to the market place we gave samples to some of the UK's most successful Fish Friers to try and without exception they all gave it the thumbs - up! Hailing this new product as the way forward with nearly all saying they would be switching to **Drywite All Seasons** in future. **Drywite All Seasons** has also been demanded by the UK's two main Frying Schools who now recommend its use as part of Best Practice.

As the name implies the major benefit of using **Drywite All Seasons** is that it has been developed to address seasonal variations in the quality of potatoes. Winter or summer, Old Potatoes or New Potatoes **Drywite All Seasons** will improve your end product. For most of the year you will require a standard dose and at times you may be able to reduce the dose. Then when sugar levels are higher you can increase the dose to suit, thus offering a variable dose and addressing issues with starch and sugar leading to darkened frying medium.

Try **Drywite All Seasons** today and everyday. We are confident that your chips will benefit from this new technology, which is unique to Drywite. So don't get left behind!

**With the cost of treating 100 portions of chips at less than 40 pence, we think it's the best investment you will ever make.**

#### Drywite Starch Testing Strips

# Drywite Formula No.2

## Potato Preparation

- ✓ Prevents discolouration in fresh cut chips & peeled potatoes
- ✓ Treats 8 portions for under 2p
- ✓ Keeps chips fresh for up to 48 hours - reducing wastage
- ✓ Economic and profitable with consistent quality

# 6 Steps

to the perfect chip...

1

Having chipped potatoes directly into a Drywite 25 Gallon Chip Bin (code SI-25). Thoroughly rinse chips to remove starch. Drain Bin of water by removing Rubber Bung. When drained replace Rubber Bung.

2(i)

Using a Drywite Solution Mixing Bucket (code DMB), mix Solution as follows:  
Fill the Bucket up to the 25 Litre mark with cold water.

2(ii)

Add one 25 gram of Drywite Formula No.2 Powder or Drywite All Seasons Powder, using the measure attached to the bottle cap. Mix thoroughly.

2(iii)

Add the solution to the chip bin by pouring over the chips. Repeat process 2(ii) until chips are fully covered.

3

Soak the chips in the solution for exactly 15 minutes.

4

After soaking the chips for 15 minutes, drain the solution away by removing the rubber bung.

5

After draining allow the chips to dry for at least 1 hour. Store in cool (10°C), dry conditions, chips will remain dry, white & ready to fry for at least 48hrs.

DO NOT RE-SOAK IN WATER!

6

For perfect crisp fried chips, fry at 188°C to 196°C.

The trusted  
solution for  
use on

**frost  
affected  
potatoes**

Drywite Starch Doctor Potato Remedy

DSD-2K 2 kg bottle, packed 6 per case.

£24.00 ea

# Drywite Starch Doctor Potato Remedy

- ✓ For frost affected potatoes and the control of sugar content
- ✓ Reducing sugar content aids the control of acrylamide
- ✓ Prevents after cooking darkening
- ✓ Use in conjunction with Drywite Formula 2 Potato Preparation to reduce discolouration of uncooked chipped potatoes

# Drywite Non-brewed Condiment

with Countertop Dispenser

A great way to  
**Increase Profit!**

The benefits of selling the **Traditional Fish & Chip Shop Taste** to your customers

# Drywite Maltflaven

## Pure Condiment Essence

- ✓ Strong, economical and consistent quality
- ✓ Maltflaven, the traditional fish & chip shop taste at a price you can afford!
- ✓ More Taste. More Servings. More Profit!
- ✓ There is no substitute for Maltflaven - the non brewed condiment essence

### Drywite Maltflaven Pure Non-brewed Condiment Essence

MF-71 7-1 dilution. 5 Litres. Packed 3 per case.

£9.50 ea

### Drywite Maltflaven Pure Non-brewed Condiment Essence

MF-121 12-1 dilution. 5 Litres. Packed 3 per case.

£14.00 ea

# Drywite Mixing Barrel

with a Vent Cap

The vent cap allows you to decant your diluted Maltflaven from the barrel without removing the cap!

If you, like many Fish Friers, use non-brewed condiment (NBC) in preference to malt vinegar you will appreciate the benefits of buying concentrated Maltflaven.

Just one, 5 Litre of Maltflaven 12-1 is all it takes to produce 65 Litres of ready to use NBC, sufficient to serve 13,000 customers and surely a desirable alternative to storing 14 gallons (64 Litres) of malt vinegar!

Maltflaven will not deteriorate, even in a warm environment, and so has an indefinite shelf life. Generations of Fish Friers understand that their customers prefer non-brewed condiment on their Fried food, producing, as it does, fewer odours and leaving them to enjoy their meal.

Maltflaven is the original non-brewed condiment, introduced over 70 years ago. Imitated by many, but never matched in taste or quality.

#### Mixing Barrel

MMB	22 Litres capacity (5 gallons).	£28.60 ea
MMB-T	Spare tap & washer.	£5.20 ea
MMB-W	Spare washer only.	£0.50 ea

# Fresh

## PRODUCE WASH

- ✓ Formulated to kill harmful bacteria
- ✓ Prevents deterioration & discolouration
- ✓ Removes all soil residues, pesticides & fertilisers
- ✓ Food grade ingredients
- ✓ Odourless & taste free, no need to rinse

Chlorine Free  
**WASH**  
for Salad, Fruit  
and Vegetables!

Specifically formulated to kill pathogenic bacteria including **Salmonella Typhimurium, Listeria Monocytogenes, Campylobacter Jejuni, E-Coli, and Staphylococcus Aureus**, which are the major causes of food poisoning.

Kills spoilage bacteria, the major cause of vegetables deteriorating and discolouring, therefore, vegetables last longer too!

Removes soil residues, pesticides and fertilisers.

It is tasteless and odour free.

Cost effective. One measure of Fresh Produce Wash mixed with water can wash over 100kg of vegetables, with the solution being used throughout the day.

Reduces vegetable waste.

Chlorine free and totally biodegradable.

GMO free, with all ingredients being of food grade quality, of plant origin and from self-sustaining crops.

Fresh Produce Wash is covered by

the Miscellaneous Food Additive Regulations, as a processing aid. Classified as non-hazardous under COSHH regulations. Directive 67/548/EEC or its amendments. FDA-CFR (Title 21) 'GRAS' STATUS.

Independently tested for its effectiveness of reducing bacteria and pesticides. The results have been startling not only for harmful pathogenic organisms such as salmonella and pesticides, but also for spoilage organisms. So not only will your customers be eating a healthier product, but if the salads or vegetables after washing are stored appropriately, they should last longer too.

### Drywite Fresh Produce Wash

FPW-2 2.5 Litre bottle. Packed 6 per case.

£12.00 ea

### Easy Dosing Pump

SP45 Fresh produce wash pump. 30 ml per stroke.

# Cooking Equipment & Utensils

## Stainless Steel vs Tinned Wire - We give you the choice - *you choose!*

Originally, core frying utensils, chip shovels, fat skimmers, fish turners etc, the tools of the trade, anything that ever got dipped into hot frying medium, continually day after day, dating back to the 1930's were made of wire and coated in tin.

It is only comparatively recently, back in the 1970's, that British utensil manufacturers, started producing utensils in stainless steel. It was believed that this new wonder material would revolutionise sales and that the old traditional tinned wire goods would diminish.

We at Drywite Ltd, the premier suppliers of utensils to the Fish & Chip Industry, believe that we should provide both. As such, we offer the traditional tinned wire and new stainless steel utensils.

Well before the rush to buy cheap imported stainless steel utensils started at the end of the 1990's, we had noticed that for 20 years the industry had a preference for tinned wire instead of stainless steel.

### So, we asked the question, why?

Until a few years ago stainless steel utensils were on average 3 times more expensive than tinned.

### So, was it down to price?

No. Because over the last few years our industry has become awash with cheap imported stainless steel, now resulting in the traditional tinned wire utensils becoming more expensive than their stainless steel counterparts. Yet despite this trend we find sales of tinned utensils out sell stainless steel varieties at the rate of 10 to 1.

### Why?

The answer is quite simple. Because tinned wire utensils last longer. Unlike stainless steel which becomes increasingly brittle in use. Being constantly dipped it into hot frying medium and soon resulting in strands of stainless wire snapping off and possibly contaminating food.

The molecular make up of the traditional tinned wire utensil remains constant and is not affected by the high temperature of the frying medium and therefore takes a lot longer to wear out.

As part of our policy for continued development, we have, over many years, inspected both types of utensils returned to us under complaint, most of which have been worn out. Both types generally have their own characteristics.

Many tend to break at the welds, which is the weakest point.

The stainless steel utensils are often returned with strands of wire missing completely.

However, the tinned wire utensils, although broken are generally still intact.

So from the point of view of both value for money and safety tinned wire utensils are the better value.

But don't take our word for it, see for yourselves.

✓ One Scoop   ✓ One Portion   ✓ Hassle Free!

Fish friers are being encouraged to give consumers the opportunity to make more informed decisions, by standardising and expanding their range of available portion sizes.

To help we have designed and tested a range of chip scoops to allow friers to confidently state the average size portion of chips served.

The scoops have been designed to ease chips past the edges and avoid costly damage to the chip. With rectangular shape the new scoops fit square and round pans alike.

In three sizes to suit 6oz (170g) 8oz (226g) and 10oz (284g) the range allows a one scoop weight controlled portion.

### Drywite Bactericidal Hand Soap

**DBHS-5** 5 Litre. Packed 2 per case. **£10.50 ea**

### 1 Litre Hand Soap Dispenser

**DWSD** Wall mounted **£26.25 ea**

### Hand Spray Bottle

<b>922R</b> Red	<b>922G</b> Green	<b>£2.20 ea</b>
<b>922B</b> Blue	<b>922Y</b> Yellow	

600ml polythene, graduated.

### Drywite Alcohol Hand Gel

**DAHG-500** 500ml. Packed 10 per case. **£4.20 ea**

### Drywite Antiviral Surface Sanitiser

**DAVS-750** 750ml. Packed 6 per case. **£2.20 ea**

### Drywite Antiviral Wipes

**DAVW-500** 500 pack. **£35.00 ea**

### Dispenser Pump

**SP** 1 ounce (approx 30 ml) per stroke. Fits all 5 Litre containers with a standard 38mm cap. **£3.60 ea**

# Cleaning Products & Equipment

**A high level of cleanliness is essential throughout all food establishments.**

Keeping floors clean, dry and grease free helps protect staff and customers from the dangers associated with slip fall incidents and reduce the risk of subsequent injury claims. The use of colour coding allows segregation of cleaning equipment and reduces the risk of cross contamination.

Drywite Ltd in association with SYR is now offering the following Cleaning Products & Equipment.

The products that make up this collection all result from many years of Research & Development. Each product has been purposely designed and tested for use in the Fast Food Restaurant and Takeaway Industries. Their robust design ensures an efficient and cost effective answer to the problems associated with cleaning within this Industry.

- **RED** Toilet Areas
- **BLUE** General Areas

# Temperature & Control Equipment

## Pocket Thermometer

**810-730** With foldaway probe. Water Resistant. -49.9 to +149.9°C. 19mm x 52mm x 155mm. **£27.50 ea**

## Superfast Thermapen

**231-257** With foldaway s/s probe. 50% faster response than traditional probes. The water resistant washable plastic casing is treated with 'Biomaster' biocide which inhibits microbial growth. Includes a traceable certificate of calibration. -49.9 to +299.9°C. 19mm x 47mm x 153mm. **£56.20 ea**

## Thermalite 1 Thermometer

**226-301** Complete with probe cover. Includes a traceable certificate of calibration.. -39.9 to +149.9°C. 28mm x 245mm. **£25.20 ea**

## 'T' shaped Cooking Thermometer

**810-285** Supplied complete with a protective probe tip cover. Water Resistant. -49.9 to +149.9°C. 30mm x 88mm x 170mm. **£20.00 ea**

## Food Check Thermometer and Probe

**221-048** Case is treated with 'Biomaster' biocide which inhibits microbial growth. Traceable certificate of calibration. -49.9 to +299.9°C. 25mm x 56mm x 128mm. **£63.00 ea**

## Bactericidal Probe Wipes

**PW-200** 180 pack **£6.50 ea**  
**832-300** Wall Bracket - Stainless steel for mounting PW-200 probe wipe tubs on wall. 80mm x 85mm x 138mm. **£10.50 ea**

## Temperature Log Books

**831-100** For recording 3 x daily readings. Lasts for 24 weeks. A5 booklet. **£3.00 ea**

## Foodsafe Fridge

**803-900** Food Simulant Thermometer. -5 to +20°C. 25mm Dia. x 150mm. **£12.60 ea**

## Dishwasher Safe Waterproof Thermometer

**810-275** Max/min memory function. Supplied with probe cover/ wall bracket. -49.9 to +199.9°C. 15 x 24 x 200mm. **£18.40 ea**

## RayTemp 3 Infrared non-contact Thermometer

**814-040** -60 to +500°C. 39 x 72 x 175mm. **£63.50 ea**

## Thermamite 1 Thermometer

**T262** A traceable certificate of calibration is included with this instrument. -49.9 to +199.9°C. 25mm x 68mm x 121mm. **£52.50 ea**

**Multi-Function Thermometer**

**810-961** Easy read LCD display, display hold feature, Max/min memory function, °C or °F (selectable), Audible alarm function, s/s penetration probe complete with 1m PVC lead, foldaway stand, pocket clip and probe cover. -49.9 to +149.9°C. 32mm x 86mm x 116mm. **£15.00 ea**

**Pocket Thermometer**

**DDT** Pen shaped design incorporating pocket clip. -49.9 to +149.9°C. 192mm x 20mm. **£15.70 ea**

**Digital Fridge/Freezer Thermometer with audible alarm**

**810-210** Features 2 sensors, a remote for the appliance temperature and an internal sensor for the air room temperature. Remote cable length 1m. -49.9 to +69.9°C. 15mm x 52mm x 73mm. **£12.10 ea**

**Dial Fridge/Freezer Thermometer**

**800-923** Stainless steel. -30 to +30°C. 60mm x 38mm x 76mm. **£4.90 ea**

**Frying Thermometer**

**800-805** Stainless steel. 0 to +300°C. 50mm Dia. x 150mm. **£7.50 ea**

**Dial Fridge/Freezer Thermometer**

**FDT** -30 to +30°C. 70mm x 60mm. **£3.50 ea**

**Hot Cupboard/Oven Thermometer**

**800-809** Stainless steel. 0 to +300°C. 45mm x 65mm x 80mm. **£5.60 ea**

**Kitchen Timer-Digital**

**DKT** With audible alarm and a pocket/foot clip. 64mm x 64mm x 13mm. **£10.50 ea**

**Max/Min Thermometer**

**810-270** Water Resistant. -49.9 to +199.9°C. 41mm Dia. x 177mm x 174mm. **£17.85 ea**
